

Project 2
Ammar Lokhandwala
CS435

Ran project with the same parameters as described in the example and got results similar to those that were expected.

All the functions seem to be working correctly, except transpose.

I had problems transposing the image as it seems to not be switching the height and width.

Did not attempt the extra credit.

Examples:

Input:

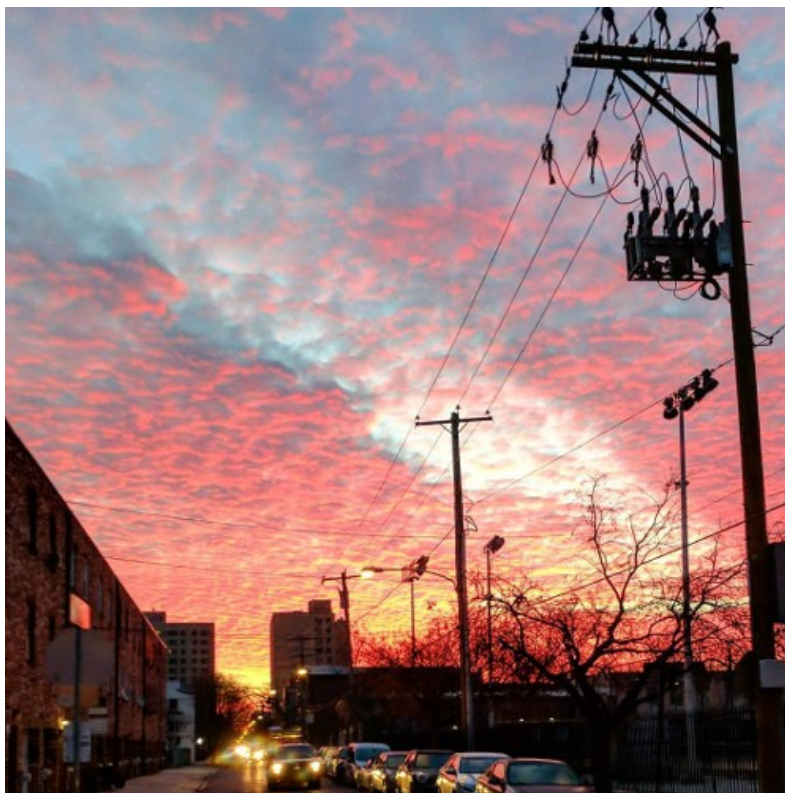

Command: `./hw1.py images/input1.jpg 400 269 output/result1.jpg`

Output:

Example 2:
Input:

Command: `./hw1.py images/input2.jpg 500 450 output/result2.jpg`
OutPut:
